

Clearing Browser History for IFQ System Updates

Internet Explorer

Under tool box (gear icon) in the upper right corner, select "Safety", then select "Delete Browser History" at the top. Make sure "Temporary internet files and website files" as well as "Cookies and website data" are selected, but "Preserve Favorites website data" at the top is NOT selected. Then click the "Delete" button.

Chrome

Under Settings (on my screen, it's the three vertical dots in the upper right corner), select "Settings". Under the "Privacy and security" section, select "Clear Browsing Data". Make sure all three boxes are checked and click the "Clear data" button.

Firefox

Under Settings (on my screen, it's the three horizontal lines in the upper right corner), select "Options". Under the "Privacy and security" section, go to "Cookie and Site Data". Click "Clear Data..." then make sure both boxes (Cookies and Site Data as well as Cached Web Content) are checked before clicking the "Clear" button.
